

GLB-IPL

Experience remarkable skin improvements with GLB-IPL

Using patented Pure Gold Wave technology, the GLB - IPL wand is placed gently on the skin, where it produces an Intense Pulse of Light (IPL).

This is transmitted through a specific filter which alters the light's wavelength range allowing it to be optimized for different applications and skin types. The pulses of light produced by the GLB-IPL are very short in duration, so discomfort and damage to non - target tissues is minor. The light that emanates from the GLB - IPL hand piece is filtered to remove any ultraviolet light components, eliminating the possibility of UV skin damage.

Benefits

- Skin rejuvenation
- Hair reduction
- Refines enlarged pores
- Reduces pigmentation
- Treats visible vessels

Features

- Focus on safety: Patented pure gold wave technology to remove harmful light
- Effective: Can treat a wide variety of skin conditions
