

LEDeluxe therapy is a gentle and natural therapy much like the process of photosynthesis, also known as photo-bio-stimulation: “the stimulation of life process with light.”

LED (Lighting Emitting Diode) uses both visible red light and invisible infrared light energy to stimulate your body's own regenerative metabolism at a cellular level (APT). LEDeluxe therapy provides energy that your own cells can use to accelerate the production of collagen and elastin.

Benefits

- Anti ageing
- Reduces fine lines & wrinkles
- Evens out skin complexion
- Skin tightening & toning
- Destroys pathogenic bacteria

Features

- LEDeluxe therapy is effective on all skin types and compliments other skin treatments eg. Microdermabrasion & O2 therapy
- Comfortable, painless, non-invasive and no associated down time
- The system provides you with three different coloured lights - Blue - Red - Mixed light
- The LEDeluxe contains 1025 LED bulbs for maximum effectiveness
- Designed on wheels for easy storage and movement throughout the salon

At Good Looking Beauty (GLB) we provide you with a complete package to ensure smooth integration of your new equipment into your salon.

Your Package Comes Complete With...

- Three lights built in
- Protective eye ware
- On site installation (Conditions Apply)
- In-salon and retail products
- Marketing concepts
- Posters
- Brochures
- Warranty
- Comprehensive training including manuals & certificate

BLUE LIGHT

Destroys pathogenic bacteria. The visible blue light emitted by PDT can be perfectly absorbed by acne bacillus and the metabolism of bacillus will generate a mass of mongline oxygen which is harmful to the life of acne bacillus, so as to kill them and eliminate acne in the skin.

RED LIGHT

The red light assists in the acceleration of the growth of collagen fiber by a photochemical biology activity. The red light acts on chondriosome in the hypoderm to generate more energy which speeds up the synthesis of DNA, RNA and produces more Collagen and Elastin.

Specifications:

- Output intensity: Red:300mW/cm2 Blue:75mW/cm2
- Output wavelength: Red:626+/-5nm Blue:405+/-5nm
- Treatment time: 20 minutes
- Lamp type: LED
- Weight: 25kg
- Unit dimensions: 75cm*40cm*140cm
- Head dimensions - overall: 25cm x 56cm
- Head dimensions - active: 23cm x 54cm
- Amount of LEDs: 1025
- Portable: Yes
- Warranty: Yes
