

With the Profect™ Studio Photography System, skin defects can be seen more clearly than ever before. And with the included Ultraviolet Digital Analysis System, you can quickly and easily show your patients the real impact of solar and actinic damage.

"The Profect™ Studio is an important photo-documentation and marketing tool for my practice, and an essential component for evaluation of sun damage. It's full color ultraviolet imaging system is creating lots of interest among patients for our aesthetic treatments."

- Ultra sharp image quality
- Ease of use
- Excellent zoom and macro capability
- Dual Image stabilisation
- Perfect shot preview function

Your Package Comes Complete With...

- On-site installation
- Warranty
- Comprehensive training including manuals & certificate

SPECIFICATIONS:

LIGHTING:

Profect's professional twin flash lighting provides significantly better image quality than single, on-camera flashes, and includes both Visible Light and Polarised lighting to capture contour, texture and laxity, as well as melanin and vascular conditions.

SOFTWARE:

The Ultra-III Image Capture and Management software lets you easily capture, standardise, store, search, and export photographs for consultations and presentations. And, with the upgrade to our Ultra-III Pro platform, it can be fully networked, allowing you to access and share images from any PC in your office.

GOLD STAR WARRANTY:

All Profect® Photography Systems include free training and are backed by our one-year Gold Star warranty and our commitment to outstanding customer service.

Rod J. Rohrich, MD, FACS
